INTRODUCTION

- Post-pandemic shift at Titan Plaza:
- 41.18% of visitors spend less than before
 - Foot traffic varies widely by day
 - Small businesses struggle with low visibility vs. large chains
 - Inventory issues = lost sales

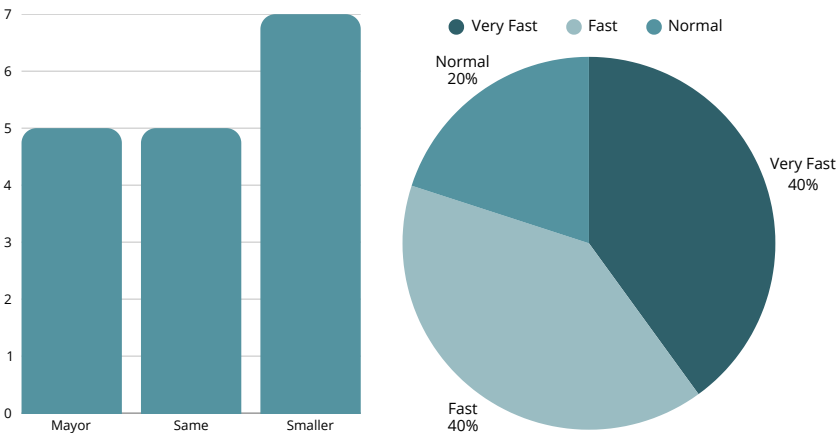

Our platform enables recovery through data-driven engagement and inventory optimization

GOAL

- Design a platform that helps small businesses:
- Increase customer loyalty
 - Reduce stockouts
- By:
- Predicting foot traffic
 - Sending automated promotions
 - Providing real-time inventory alerts

RESULTS

Customer spending
41.18% of visitors now spend less than before
→ Need for personalized promotions + loyalty programs

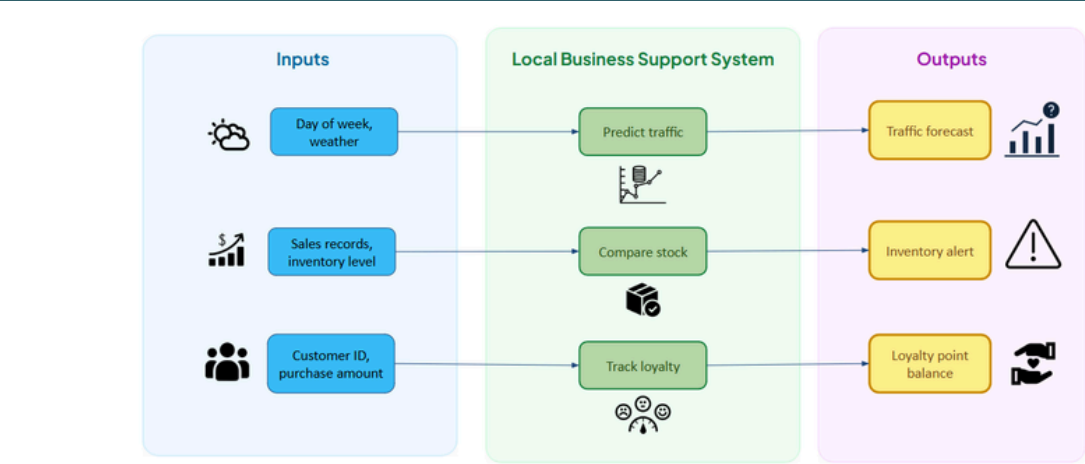

Inventory rotation
80% of small stores report fast or very fast product rotation
→ Inventory alerts essential to prevent stockouts during peak hours

EXPERIMENTS

Method	What we did
Direct observation	Foot traffic counted Saturday (9am–12pm) & Sunday (12pm–3pm) in small stores area
Surveys	17 customers + 5 employees → spending habits, visit motives, inventory management
Enviromental correlation	Weather + day of week recorded to understand foot traffic drivers

PROPOSED SOLUTION

CONCLUSION

The platform directly addresses post-pandemic challenges at Titan Plaza:

- Personalized promotions + loyalty programs → counter the 41.18% drop in customer spending
- Inventory alerts → prevent stockouts where 80% of products move quickly

Outcome: Small businesses get real-time data to compete with larger chains and adapt to new consumer behavior.
